

ABILITIES FIRST FINE MOTOR/WRITING CAMPS

WHAT WE WORK ON

A variety of writing activities will be completed each week and will be individualized to your child's writing skill and developmental level (from letter formation to sentence writing).

Sensory Motor Activities, Brain Gym, and Bal-A-Vis-X will emphasize right/left awareness, build core strength, and get your child ready for writing.

Fine Motor skill building activities and games address 2 hand use, hand coordination, functional grasp, turn taking, attention to task, and following directions.

Parents will be given strategies and fun homework activities to use at home each week to promote progress.

Writing materials and workbooks are included.
